Mark **Everett**

Senior Software Engineer
Oakland, CA • they/them

✉ hire-mark@mynnx.com

☎ (707) 646-9669

Passionate full-stack developer with strong tendencies towards front-end development. Cares greatly about **design**, **UX**, and **accessibility**. My experience as a product manager has taught me how to discern between "important" and "necessary" and has taught me how to deliver the least amount of software that makes the **biggest impact**.

My skills and my mindset are strongly geared towards maintaining and improving an existing ecosystem, and I am also capable of building complex products. I want to mentor junior developers and learn from senior ones.

In my next role, I'm seeking a company whose mission promotes any of: equality, accessibility, healing, diversity, sustainability, or creativity.

Skills

Javascript	Node	Docker	Communication
React	Hapi	Jenkins	Empathy
Redux	PostgreSQL	Selenium	Organization
Styled Components		Git	Development Process

Work History

Earnest	**Senior Software Developer**	**January 2016 - April 2019**

- Contributed code and architecture ideas in support of launching a student loan origination product, home mortgage product, referral bonuses, and new underwriting tools on teams of ~5 engineers each
- Built a company-wide React component / style library; established contribution process for engineers & designers
- Led the transition away from a monolithic frontend built in Angular to a modular one written in React
- Deployed several new Docker services with a Jenkins CI pipeline
- Built a tool used by 100+ engineers for deploying microservice UIs to S3
- Got more intimate with Webpack than any reasonable person should ever be
- Found clever ways to cut scope, optimize for learning, and avoid building unnecessary features

Rackspace Hosting	**Software Developer, then Product Manager**	**2009 - 2015**

- Implemented Twisted services that use Thrift and RabbitMQ for coordination
- Modified Chef recipes and deployment code to support new features
- Built provisioning APIs for the Email and Apps division of Rackspace in Python and Perl
- Gathered requirements, built mockups, and did agile planning for a team of 6 engineers

Education

Bachelor of Science in Computer Science from **Virginia Polytechnic Institute and State University (Virginia Tech)**, 2009
